3 Things I Absolutely Should Know Today

GitHub Copilot Free Plan Launch

What happened: GitHub announced a free tier for Copilot offering 2,000 code completions per month at no cost, integrated into popular IDEs such as VS Code.

Why you should care: As a Diploma IT student, you can access an AI coding assistant for routine programming tasks, project work, and exam preparation without spending money, helping you write code faster and learn best practices.

Impact: Medium

CERT-In warns Google Chrome users of critical remote code execution flaws

What happened: India's Computer Emergency Response Team (CERT-In) issued an advisory on 17 August 2026 highlighting multiple high-severity remote code execution vulnerabilities in the desktop version of Google Chrome.

Why you should care: As a Diploma IT student, many coursework and lab environments rely on Chrome; unpatched browsers could expose your development work and personal data to exploitation.

Impact: Medium

India

Union Cabinet approves Rs. 14,500 crore VGF scheme for large-scale energy storage

What happened: The Indian government announced a Viability Gap Funding scheme of Rs. 14,500 crore to support the deployment of 92 GWh of new grid-scale energy storage capacity between 2026-27 and 2030-31.

Why you should care: Access to affordable, reliable storage will accelerate renewable-energy projects and create demand for IT-related roles in system integration, data analytics, and IoT monitoring-areas where a Diploma IT graduate can find entry-level positions.

India approves USD 297 million Critical Mineral Processing Scheme

What happened: A government program worth USD 297 million was launched to develop domestic capacity for processing critical minerals, reducing reliance on imports for high-purity compounds used in electronics and clean-energy technologies.

Why you should care: The scheme will boost local manufacturing of components that underpin hardware and semiconductor work, increasing opportunities for IT students in supply-chain software, automation, and R&D collaborations with mineral-processing firms.

My Action for Tomorrow

Enroll in Harvard's free CS50 online course and begin the first module to supplement your Diploma IT curriculum.

If You Only Remember 3 Things

• GitHub Copilot's free tier gives you instant AI-assisted coding without cost.

• Patch Chrome immediately to avoid remote code execution risks highlighted by CERT-In.

• Leverage the free CS50 course to deepen core computer-science knowledge and boost employability.
