3 Things I Absolutely Should Know Today

Free AI & Cloud Certification Prep - Anthropic Academy and Other Platforms

What happened: Multiple providers, including Anthropic Academy, now offer completely free AI and cloud certification preparation courses without paywalls, covering fundamentals of large language models, prompt engineering, and cloud services.

Why you should care: These courses align with core IT diploma topics such as cloud computing, AI fundamentals, and emerging technologies, and provide certificates that can strengthen your résumé for internships or entry-level jobs in India's growing tech sector.

Impact: Medium

Tools Worth Trying

Visual Studio Code (VS Code) - Free, Extensible IDE

What happened: VS Code remains the leading free code editor in 2026, offering a lightweight core with a vast marketplace of extensions for languages, debuggers, Git integration, and AI-assisted coding.

Why you should care: As a Diploma IT student, VS Code provides all the tools needed for coursework, labs, and project development without licensing costs, and its extensions can streamline learning new languages and frameworks.

Impact: Medium

Tech Outside AI

Tesla unveils Dojo 3 AI accelerator with 80× performance boost

What happened: Tesla announced its third-generation Dojo training accelerator, branded SI6, promising up to 80 times more compute performance than previous versions and plans to deploy it in terrestrial data centres and on SpaceX missions.

Why you should care: Understanding cutting-edge AI hardware trends helps Diploma IT students grasp future requirements for deep-learning workloads and informs choices when building or optimizing models for high-performance compute.

My Action for Tomorrow

Enroll in the free AI and cloud certification preparation course offered by Anthropic Academy or another listed provider and begin the first module.

If You Only Remember 3 Things

- Free AI and cloud certification courses are now available without paywalls; use them to boost your résumé.
- Telangana's partnership with AWS provides no-cost AI/cloud training for eligible students; take advantage to gain industry-recognized skills.
- AI-driven attack tools like ARTEX are targeting the financial sector; familiarize yourself with defensive AI techniques to stay competitive in cybersecurity roles.
