3 Things I Absolutely Should Know Today

React Native Full Course 2026 - Build, Publish and Monetize a Full-Stack Mobile App

What happened: A YouTube tutorial released in 2026 walks through React Native fundamentals, app development, publishing to the App Store, and monetization strategies.

Why you should care: Mastering React Native lets a Diploma IT student create cross-platform mobile apps using JavaScript, a skill in demand for startups and IT firms across India.

Impact: Medium

CERT-In Alerts to Critical Remote-Code-Execution Flaws in Google Chrome

What happened: CERT-In released advisory CIVN-2026-0505 identifying multiple critical vulnerabilities in desktop Google Chrome that could allow attackers to execute arbitrary code, steal data, and gain elevated privileges.

Why you should care: Chrome is the default browser for many development and testing environments; patching promptly protects your development machines and any web-based tools you use for coursework or internships.

Impact: Medium

What to do: Apply the latest Chrome security updates immediately and verify that automatic updates are enabled.

Google Announces India AI Hub in Visakhapatnam

What happened: Google held a groundbreaking ceremony for a new India AI hub in Visakhapatnam, aimed at creating a national industrial ecosystem for artificial intelligence alongside India's digital infrastructure initiatives.

Why you should care: The hub is expected to foster AI research collaborations, provide training programs, and create internship opportunities that can enhance practical AI skills for IT diploma students in India.

Impact: Medium

Cybersecurity

CERT-In Issues Critical Advisory on AI Agents Exploiting Indian ICT Assets

What happened: CERT-In warned that AI agents used in research and by financially motivated attackers accessed live systems of Indian organisations, exploiting exposed credentials, mis-configured cloud roles and permissive settings to read business records and personal data.

Why you should care: As a Diploma IT student, you will likely work with cloud services and APIs; understanding AI-driven attack vectors and tightening access controls is essential for securing future projects and complying with Indian regulations.

Impact: Medium

CERT-In Alerts to Critical Remote-Code-Execution Flaws in Google Chrome

What happened: CERT-In released advisory CIVN-2026-0505 identifying multiple critical vulnerabilities in desktop Google Chrome that could allow attackers to execute arbitrary code, steal data, and gain elevated privileges.

Learn

No-Code AI Automation Full Course - Master the fundamentals from scratch

What happened: A comprehensive YouTube masterclass by Vivek Mishra covering AI automation concepts, tools, and hands-on projects without requiring programming.

Why you should care: Offers a free, beginner-friendly pathway to acquire AI automation skills relevant for entry-level IT roles and project work in Indian diploma programs.

Impact: Low

Opportunities

Open Source in India 2026 - GirlScript Summer of Code (GSSoC)

What happened: GirlScript Summer of Code 2026 is a free, three-month open-source program (May - August) that welcomes beginners and advanced students, offering mentorship and beginner-friendly issues across many projects.

Why you should care: Participating gives a Diploma IT student hands-on coding experience, mentorship, and a resume-worthy open-source contribution record, all without any cost.

Impact: Medium

Tech Outside AI

NVIDIA unveils RTX Spark chip for AI on Windows PCs

What happened: NVIDIA announced the RTX Spark, an Arm-based processor combining 6,144 CUDA cores with a 20-core Arm Grace CPU, offering up to 1 PFLOP of FP4 AI performance and up to 128 GB unified memory.

Why you should care: The chip brings high-performance AI inference to laptops and desktops, enabling local deployment of AI agents and tools without relying on cloud services-useful for project

work and lab experiments in a Diploma IT curriculum.

Impact: Medium

Arm-based Bluefield-4 DPU boosts rack-scale AI inference

What happened: Arm's Bluefield-4 data-processing unit, built on the Neoverse V2-based Grace CPU, delivers up to six times the compute performance of its predecessor and introduces AI-specific storage optimizations for rack-scale inference.

Why you should care: Understanding DPU advancements helps you design efficient AI workloads for edge and data-center environments, a skill increasingly demanded in Indian IT internships and campus projects.

Impact: Medium

My Action for Tomorrow

Update Chrome on your development workstation to the latest version and enable automatic security updates.

If You Only Remember 3 Things

- React Native tutorial offers a practical path to cross-platform app development with JavaScript.
- Critical Chrome RCE flaws demand immediate patching to keep development environments secure.
- Google's new AI hub in Visakhapatnam will create AI training and internship opportunities for Indian IT students.
